DETAILED ACTION

Claims 1-20 are presented for examination.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to detecting a predetermined invalid bit pattern in a digitally encoded bitstream, classified in class 714, subclass 811.
- II. Claims 10-20, drawn to error mapping for a memory array, classified in class 714, subclass 723.

The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as when a detected error or fault is registered or recorded to present a history for diagnostic purposes. See MPEP § 806.05(d).

Inventions Group I and Group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group II has separate utility such as when a forbidden combination (a predetermined invalid bit pattern) of digital data, or improper condition is monitored to enable error or fault detection. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Ronald Clark on 9/2/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Examiner attempted to reach applicant's representative at the following phone numbers 949-225-4080, and 949-673-7574, however, attempts were unsuccessful.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cynthia Britt whose telephone number is 703-308-2391. The examiner can normally be reached on Monday - Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Albert Decady can be reached on 703-305-9595. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
